

## Fast Track: iOS

### Learn iOS development this semester!

You already have some coding skills. Want to learn how to create a custom iOS app? This UA Fast Track program is for you!

# **FAST** TRACK

## iOS APP DEVELOPMENT

Fast Track: iOS App Development is a 12-week program starting January 23. Created by CodePath.org especially for university students, the curriculum applies the rigor and standards of real tech companies.

With over 1 billion active Apple devices in the world today, knowing how to create iOS apps can connect you with hundreds of millions of users worldwide (**plus a lot of employers seeking this in-demand skill!**).

### Don't miss this chance to dive deep into one of the most ubiquitous technologies around:

- ▶ During the first half of the program, you'll build your skills through labs and projects using the APIs of popular apps like Tumblr, Yelp, and Twitter.
- ▶ During the second six weeks, you'll work in small teams to build a completely original app from the ground up.
- ▶ The culmination of the program is a Demo Day event where you'll present your finished products to an audience of peers, faculty, and industry professionals.

### Program requirements:

- ▶ All majors welcome, but you must have coding experience and complete a pre-work assignment.
- ▶ All participants must have access to a Mac computer.
- ▶ All participants must be available to attend in-person sessions, January 23-May 1, Mon./Wed., 4:00-6:00p.m.
